AVERY™

Smart Filing Solutions

Avery Lateral Filing gives you all the space you need

From Ok Office Pty Ltd

Do the filing with your eyes closed

After years of using an outdated card system, Avery® Lateral Filing was a sight for sore eyes.

Background

For over 30 years Sydney Ophthalmic Specialists have been taking care of paediatric and general eye conditions. The team has grown to 4 specialists and 6 support staff and maintaining a streamlined and accurate operation is paramount.

With over 10,000 patient files taking up much needed space in the office, it became quite clear that their existing antiquated card system was not serving their needs. It required the use of sticky tape to attach new record files together which, over time peeled and meant that cards for different patients would become lost as they stuck to other record cards.

An accurate and space-saving solution

Sydney Ophthalmic Specialists contacted Avery and their stationery dealer and after discussing their current problems in great depth they discovered that the Avery Lateral Filing system was the obvious solution. The system offered a much more accurate and user friendly approach to maintaining their patient records.

The Avery Lateral Filing system meant that correspondence and patient notes could now be filed flat and be securely attached within the lateral files using Avery Tubeclip File Fasteners. Utilising the Avery® FilePro® software to colour-code the lateral files in a numeric sequence saved time and minimised filing errors to almost zero.

Outcome

Since installing the Avery Lateral Filing System, the practice has borne witness to many benefits. Staff can now find files easily and manage them effectively with a system that is supported by Avery software.

Thanks to the new system, the practice is running more efficiently and culling files is no longer wasting time, money and effort.

With simple new procedures for transferring files over, which will translate easily to new patient file creation, this system is slick and allows the staff to be extra proficient in their day-to-day operations.

"We are so much more efficient and staff are happier than ever before which translates to our patients." says Susie Porter, Practice Manager

Avery® Lateral Filing Solutions

Misfiled

Benefits of Lateral Filing

✔ **Save Space**

The Avery Lateral Filing System can save you substantial floor space as you can now store files laterally to higher levels.

✔ **Save Time**

The Avery Lateral Filing System is so easy to use, everyone will understand the system and be able to find files at a glance.

✔ **End Misfiling**

The Avery Lateral Filing System makes it easy to find files virtually eliminating all possibilities of misfiling, saving you hours of fruitless file searching.

✔ **Easy Access**

The Avery Lateral Filing System allows more than one person to access files at any one time. So no more time wasted queuing at the cabinets.

✔ **Increase Productivity**

The Avery Lateral Filing System is quick and easy to use, which translates to less time wasted retrieving files and a more productive use of your time.

2.18m²

0.60m²
Based on 1200mm wide cabinet
Conventional file drawers take up valuable floor space and are difficult to access.
Avery Lateral Filing Systems save you up to 70% floor space and 40% access time.

Questions?

There are a few important questions to ask yourself before you meet our Lateral Filing Expert.

- What are my key challenges? Is it space, organisation or productivity?

- Do I want to set up an entirely new system?

- How many files do I plan to convert to lateral filing?

- Am I planning to use existing filing cabinets or shelves?

- Do I need to add or retrieve information from my file?

- Can I add a divider to lateral files?

Filing Consultation

Our Avery Lateral Filing Expert will discuss with you the right filing solution that suits your needs.

Auto Lateral Filing

Filing is as easy as 1-2-3 with Avery® FilePro®!

Who doesn't want to save time and get their work done quicker? Avery FilePro Software is easy to use and is a great tool to help you file quickly. It has numerous pre-designed templates and colour options that give you the freedom to customise your filing labels. Simply design, print onto Avery Lateral Filing Labels and apply to any Avery Shelf Lateral Files. Refer to p.8-12.
| DESIGN | PRINT | APPLY | AND YOUR JOB IS DONE! |

Avery® FilePro® Software

Code	Description	Quantity
40000	Avery® FilePro® Software - Single User	1
40001	Avery® FilePro® Software - 2-10 User	1
40002	Avery® FilePro® Software - 11 + User	1
959095	Avery® Lateral Filing Labels A4 4 Per Sheet	Box of 100 Sheets

Install Avery® FilePro®

1. Insert the CD into a CD-ROM drive. If the installation doesn't autorun within a minute or so, browse the CD and double click on the Setup.exe.

2. Read the license agreement, then click 'I Agree' if accepted.

3. Select Stand-Alone or Network install type. Make a selection for All Users or Current User, and Desktop Icon when prompted. If installing a Network type, you will need to first install the network files to a server shared folder, then from a client computer browse to the share folder where the program was installed and double click on the ClientSetup.exe to start client installation.

4. Select the path for the program. Most cases can use the default in Program Files. If Network type, select the install location for the Jobs folders (label designs). Most cases use the server share where the network files are installed.

5. Run the program. Enter the serial number as indicated on the CD cover the first time the program is run, and activate according to prompts. For users of 2-10 and network, go to Update Seats to enter seat certificate number* once FilePro® is installed.

   * Seat certificate number is also indicated on CD cover.

System Requirements:

O/S: Windows ®2000, Windows®7, Windows® 8, RAM: 512MB, Free Disk Space: 1GB, Mouse and Keyboard, VGA/SVGA card with 4MB, RAM, CD-ROM & Windows® compatible printer.

Step 1.

Select Sample Labels for standard designs. Add any Sample Labels to the My Labels library if needed by clicking on the link at the bottom of the label design in the Sample Labels library.

Select a label design by clicking on a design name, or anywhere in the cell when the cursor changes to a hand.

Once you select a label template:

Go to Enter Data screen or import your data via import field.

To manually enter data, press Insert key on your keyboard or Switch to Data Entry on the left displays.

If you wish to import data from an existing database, simply import a csv file via excel program.

To generate sequential numbering, go to Define Data Sequence and then create the number of records you wish to print.
Step 2.

Edit element colour is optional. FilePro® covers a range of colours that are most commonly used in lateral filing. Simply select a colour that suits your filing system.

Right mouse click and edit element.
Step 3.

Click Next in the lower right-hand corner to go to the Print Labels screen.
Step 4.

Select or verify the Printer Type as inkjet or laser. Click Print, make sure the right printer is selected, it is turned on, and that it has a label sheet loaded correctly. Click OK to print.
Step 5.

After you click OK or Cancel, go to the Print Complete screen. Click one of the available options to print again, export the existing data, go back to the Select Label screen, or enter more data in the same grid. To exit the program, simply close the window.

For more details on running the program and advanced features after installing, please click Help or simply call the Avery Consumer Service Centre.

Visit www.averyproducts.com.au/fileprodemo to view the FilePro® demonstration video or contact us for a demonstration CD.

* Custom templates are available upon request

Shelf Lateral Files

Avery Shelf Lateral Standard Files

To secure your documents in your lateral files use the Avery range of file fasteners.

See page 16.

File with Quickvue™ – the smart alternative to suspension files

Why not make a smart and simple choice and use Quickvue™ files with your existing system, both filing cabinet drawers and personal pedestal drawers. Just add a file rack to each drawer and you will instantly discover how Quickvue™ is the cost effective organised alternative to suspension files. You can easily identify files thanks to the angled tab across the top of each file. The file rack also eliminates the problem of files falling off the metal rails, files bending due to their heavy weight as well as crystal tabs falling off the top of each file.

Two and four drawer packages are available with drawer cabinets (see below).

Quickvue™ Files & Drawer Cabinet Packages

Avery Drawer Filing Packages

4 Drawer Filing Package

• 1x4 drawer cabinet, 200 Quickvue files, 288 file title labels
• 1 top tab labels starter kit, 4 racks 500x390mm

Code	Colour	Size

Accessories

Tubeclip® File Fastener

Consists of 3 pieces: A self adhesive base which sticks to the file surface, a plastic coloured compressor bar which is placed on top of the pages and the plastic U piece which inserts into the compressor bar to secure the documents. The Tubeclip® expands as your file fills, to eliminate wasted space.

Filing Cabinet/
Stock Packages

Filing consultations are available on request.

Avery Lateral Filing Packages

Save valuable office space by transforming chaos into order. Choose from seven filing packages incorporating cabinets, files, file fasteners, labels, outguides and labelling software. The Tambour Door Cabinets are lockable to secure your documents safely. The Open Bay Cabinets have easy access with no door and are ideal when used by numerous people on a frequent basis.

**Packages include a number of the following items:**

Levels................... Refers to the number of shelves within the cabinet.

Rear Stops......... Support shelf dividers at the back of the cabinet.

Shelf Dividers... Act like bookends allowing you to store files within the cabinet.

Lateral Files...... Are white foolscap extra heavy weight files with a 35mm expansion.

Tubeclip®........... Easily attach to lateral files to ensure pages are secure. Tubeclip® expands as the file fills, eliminating wasted space.

Outguides.......... Are used when a file is removed from a filing system. Simply place the file with an outguide on which the file user can note where the file is going.

Avery Lateral Filing Labels 4 per sheet.

Avery FilePro® Software Single licence.

All cabinets available in a wide range of colours including Cream, Oyster Grey and Grey.
